

# How to Make a Square from Rectangular Paper

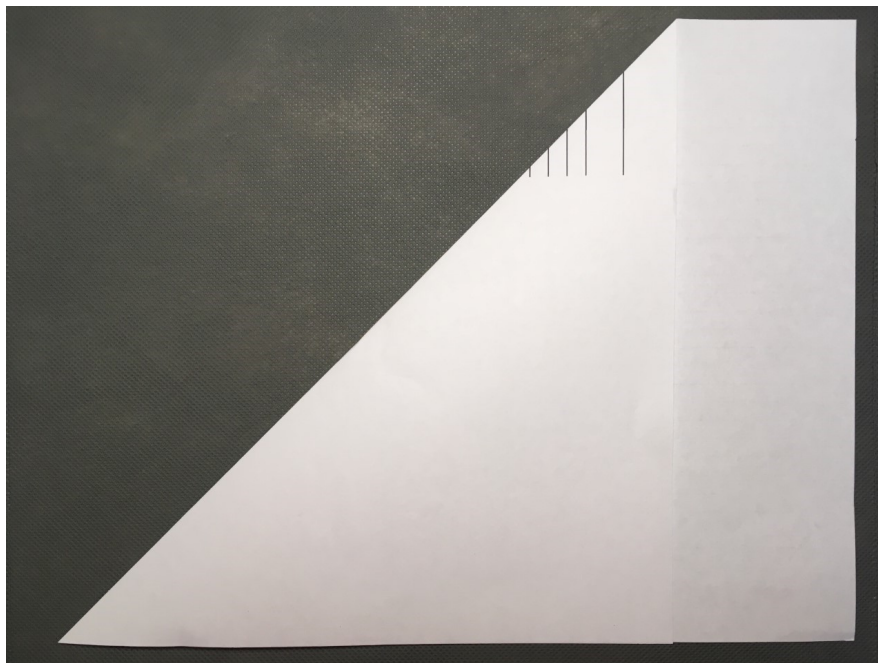

## Step 1

Lay your rectangular paper flat.

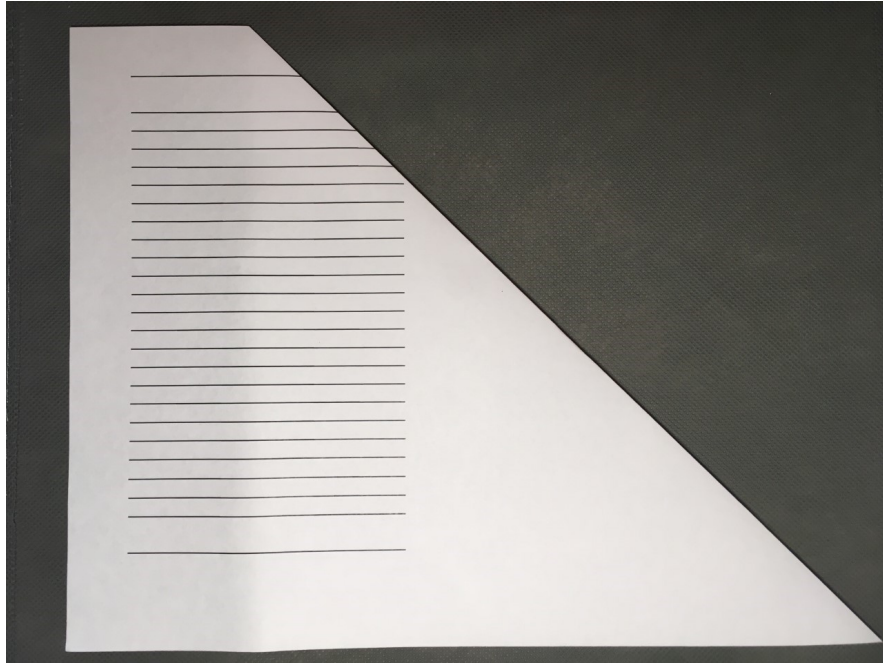

## Step 2

Fold one corner down until it reaches the opposite edge. You should now have a shape that looks like a triangle with a long skinny rectangle attached.

### Step 3

Flip the paper over.

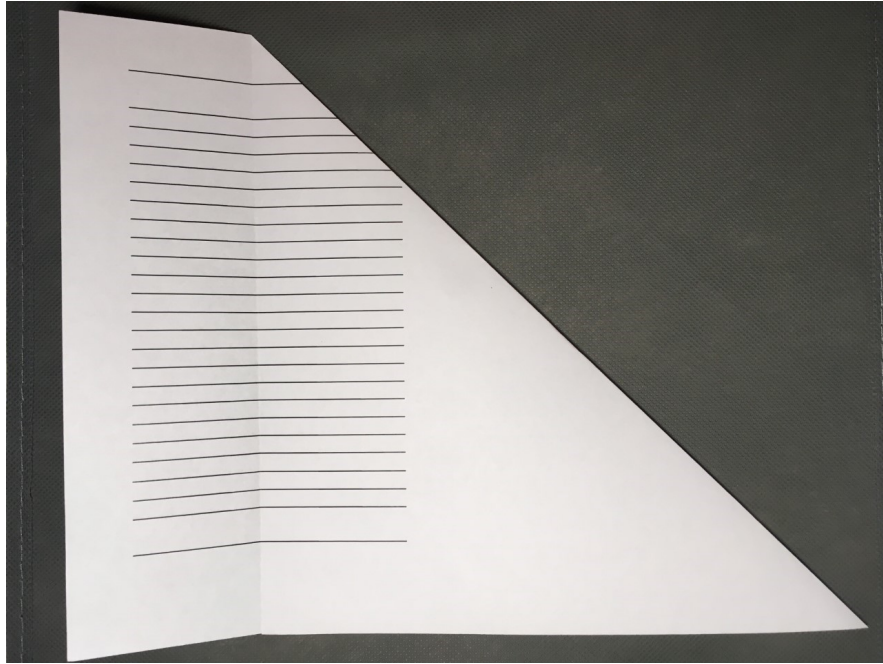

### Step 4

Fold the section of the paper that isn't part of the triangle so that it overlaps the triangular part of the paper.

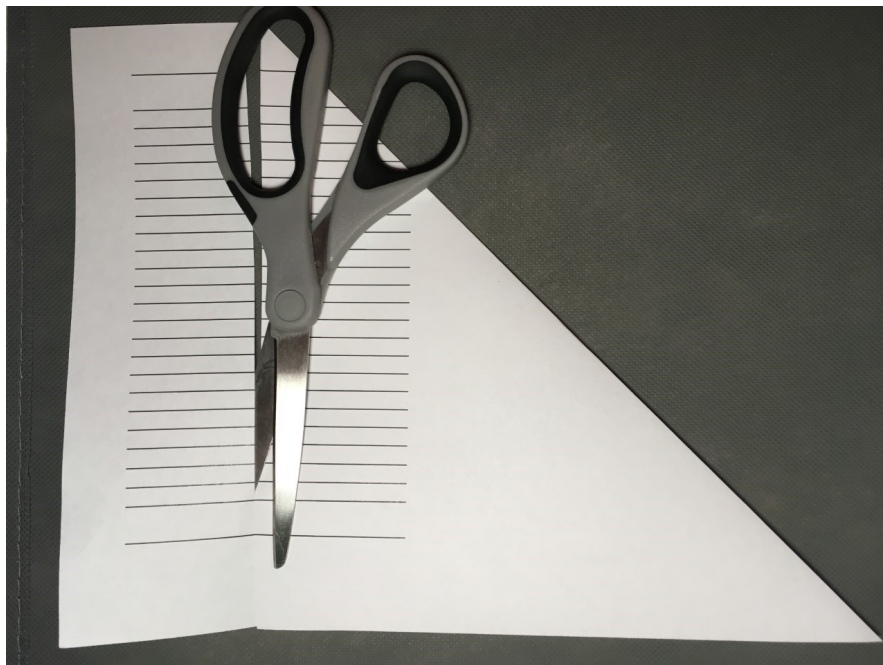

## Step 5

Open up the fold.

## Step 6

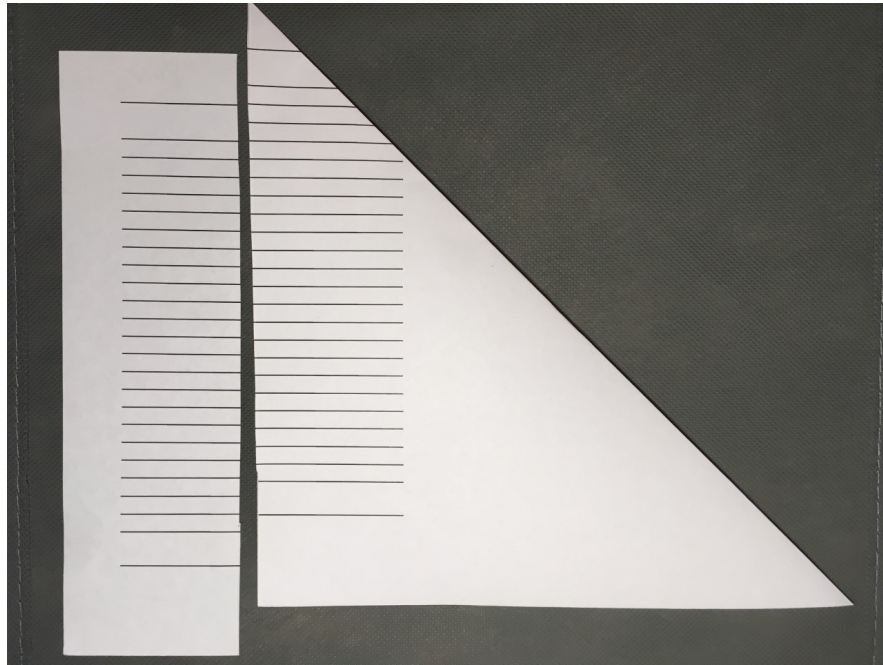

Using the crease you just created as a guide,  
cut off rectangular section of the paper from the triangular section of the paper.

## Step 7

Once you have cut off the rectangle, discard.

(Or save for a different art project!)

## Step 8

Unfold the triangle, and you now have a square!
