

# TWEEN ZONE

## Star / Octagon

### Step 1

Start with 8 parallelograms

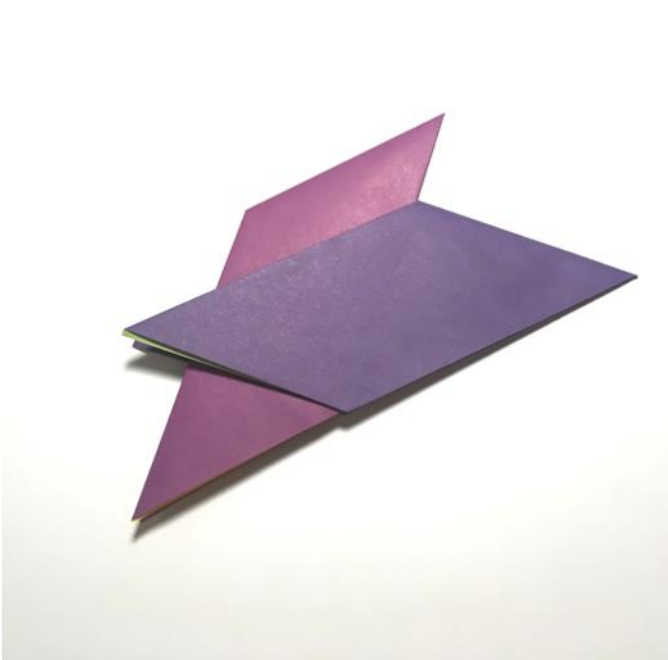

### Step 2

Place one of the parallelograms so that the closed side is on the right side

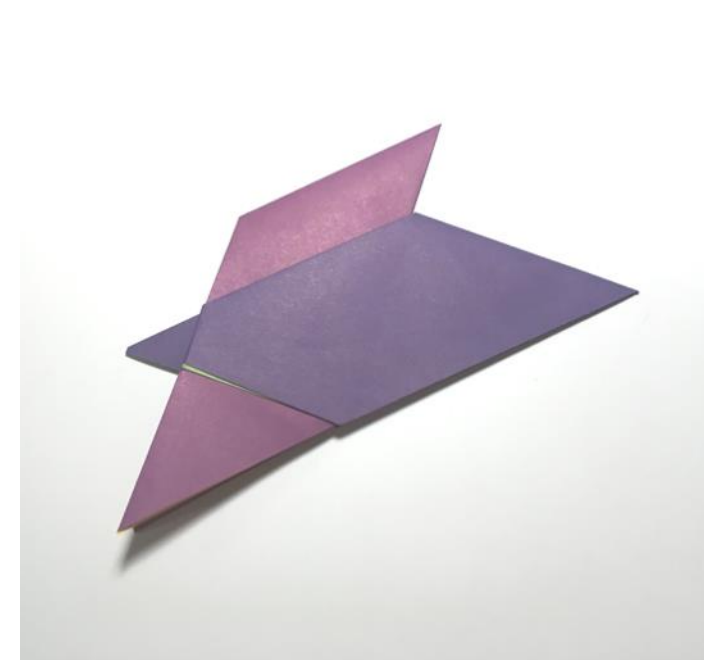

### Step 3

Place a second parallelogram inside the first. The closed side of the second parallelogram should be at the top.

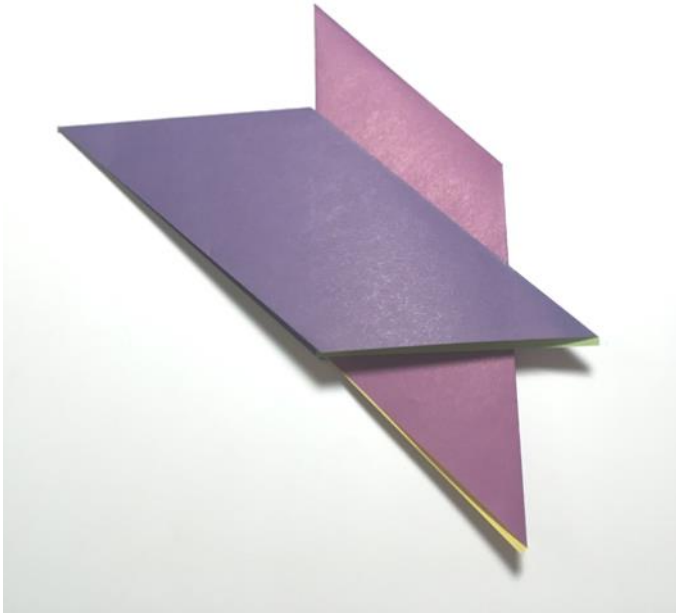

### Step 4

Fold the left corner of the first parallelogram into the fold of the second.

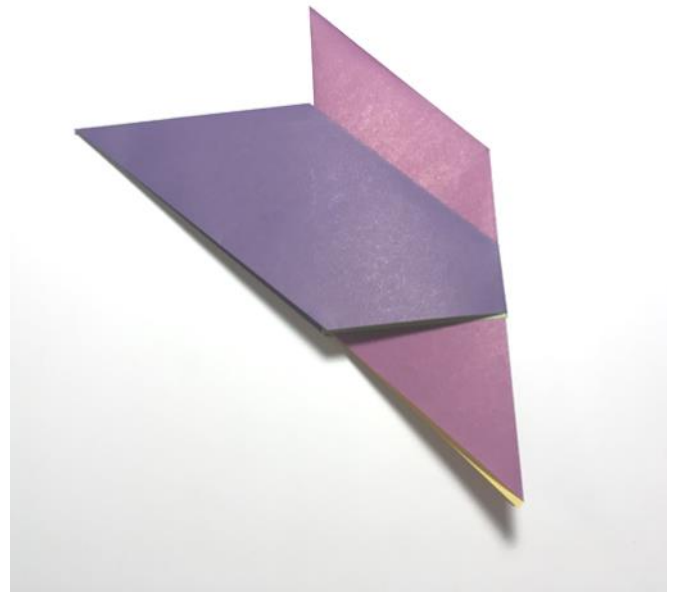

### Step 5

Flip over.

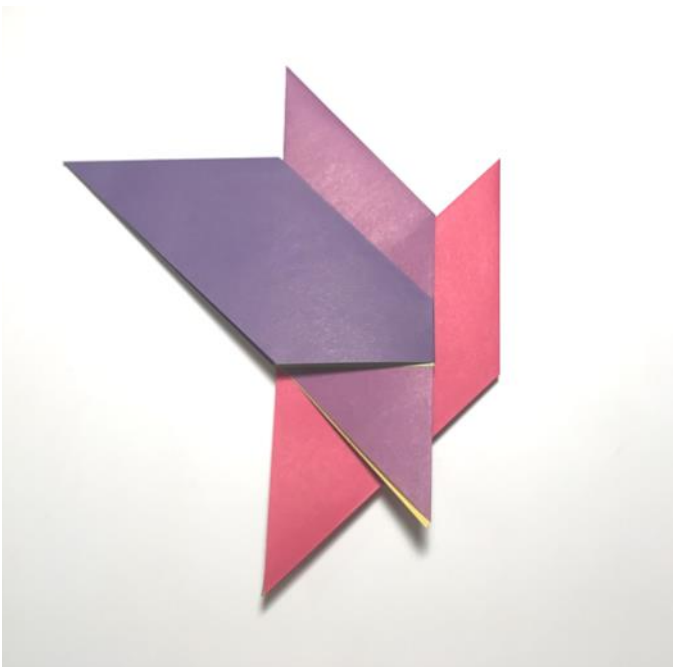

### Step 6

Fold the remaining corner of the first parallelogram into the fold of the second.

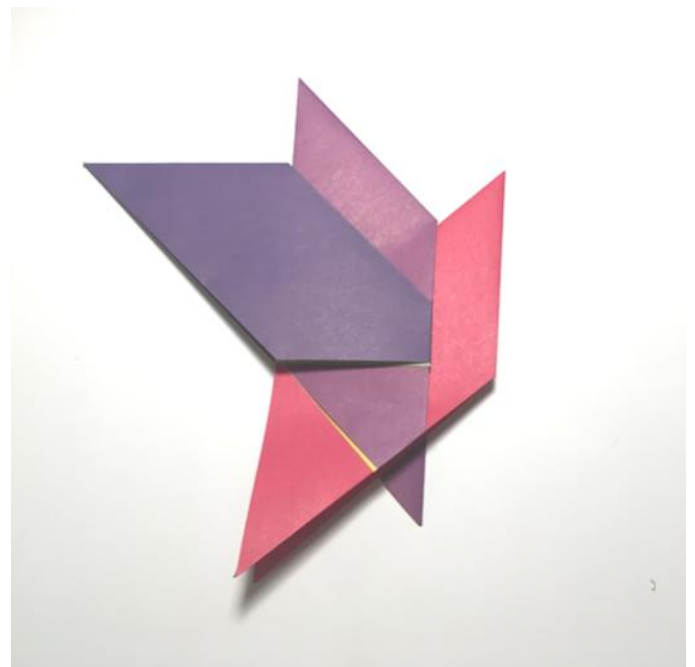

### Step 7

Add a third parallelogram inside the fold of the second. Make sure the closed side is on the right.

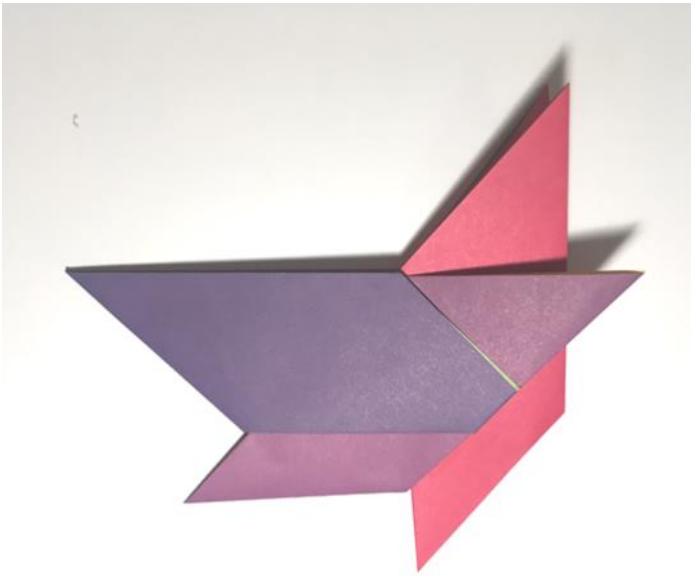

### Step 8

Fold the bottom corner of the second parallelogram into the fold of the third.

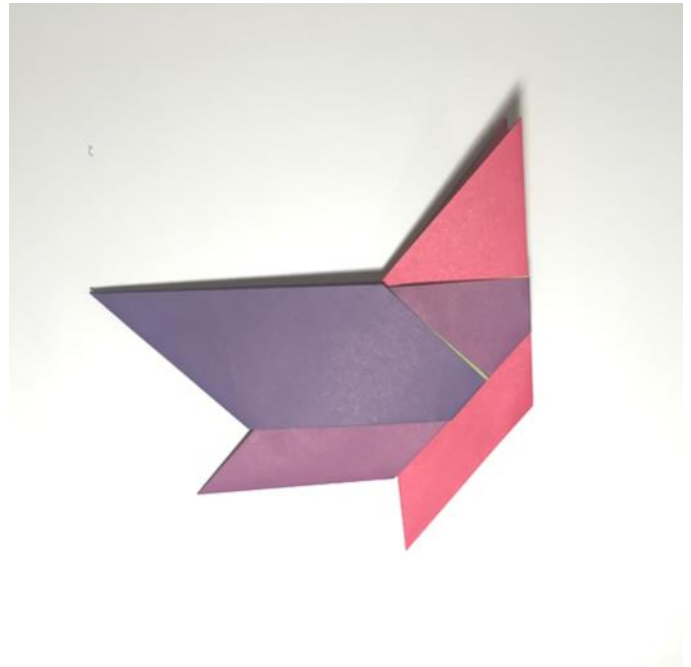

### Step 9

Flip over.

### Step 10

Fold the remaining corner of the second parallelogram into the fold of the third.

### Step 11

Continue adding parallelograms until you only have two left.

### Step 12

Add the seventh parallelogram.

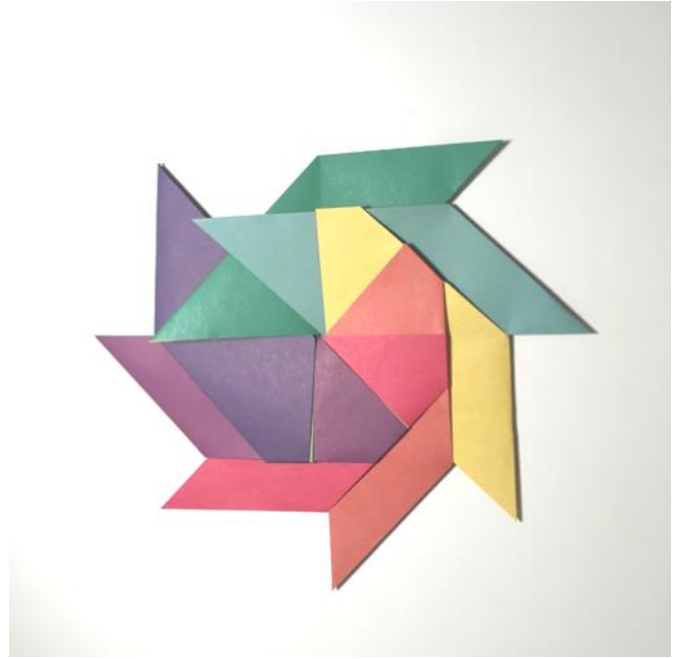

### Step 13

Flip over.

### Step 14

Pull the flap from the seventh parallelogram so that the first parallelogram is inside the seventh.

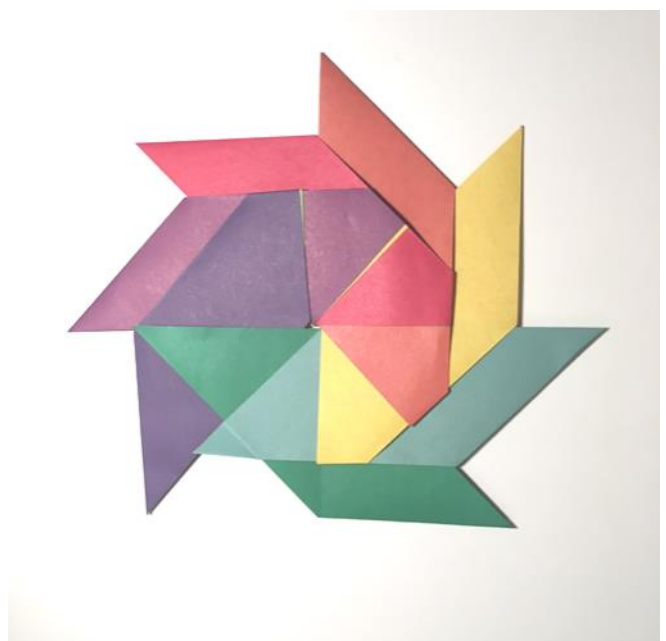

### Step 15

Fold the corner of the sixth parallelogram inside the seventh.

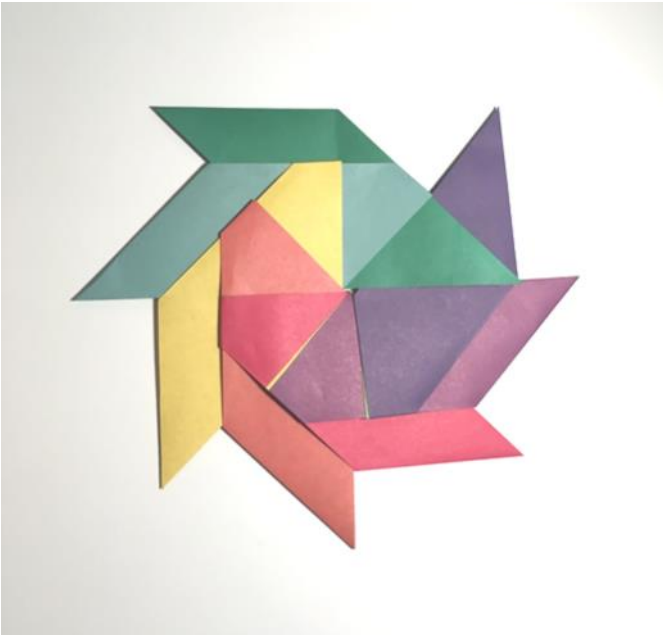

### Step 16

Flip over.

### Step 17

Fold the corner of the sixth parallelogram inside the seventh.

### Step 18

Add the final parallelogram.

### Step 19

Flip over.

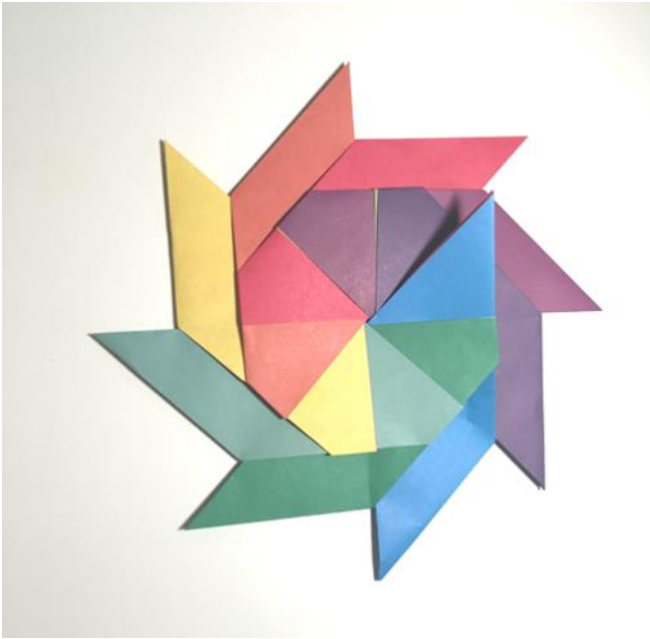

### Step 20

Pull the flap from the eighth parallelogram so that the first parallelogram is inside the eighth.

### Step 21

Fold the corner of the seventh parallelogram inside the eighth.

### Step 22

Fold the corner of the eighth parallelogram inside the first.

### Step 19

Flip over.

### Step 20

Fold the final two flaps.

**To transform the star into an octagon:**

Gently pull on the center parts of the star (not the outer blades), pulling it apart.
